24. August 2023

Target of this regulation is to register all substances which are produced or used in the EU and to document the environmental influences. REACH also addresses the continued use of chemical substances of very high concern (SVHC) because of their potential negative impacts on human health or the environment.

Registration / Evaluation:

CENTROPLAST produces semi-finished and finished parts made of plastic materials for various industries. According to REACH we are only concerned as so-called "downstream user", because we are not producing primary substances or chemicals. So, we are not obligated to register our products. As a downstream user we will follow the obligations and we request from our suppliers to make sure that all chemical substances used are registered in the REACH data base. To hold our high level of product security we will control the implementation of REACH with our suppliers.

Authorization / Restriction (substances with properties of very high concern SvHC):

Centroplast will inform immediately if one of the banned substances is in delivered parts with proportion of more than 0,1% (regarding article No. 33 (1) of Reach regulation).

This declaration is valid for the delivered parts in the attached annex.

If you have any further questions according to REACH in our company we kindly ask you to contact us directly.

Best regards
