

Individual finished
plastic components

“Plastic machined components
provided by your specialist!”

Complex tasks - precise results!

You supply the idea - we'll provide the finished construction

We are your partner for high-quality mechanical machined components with complex geometries. Whether milling, lathing, joining, drilling or grinding - you will benefit from our high level of competence and expertise in all mechanical departments. Our specialities are small and medium-sized series and special products of individual parts and components coordinated with you. Our high-quality plastics fulfil all quality factors so they can be used in mechanical engineering in a huge range of industries, such as medical technology and the electrical and automobile industries.

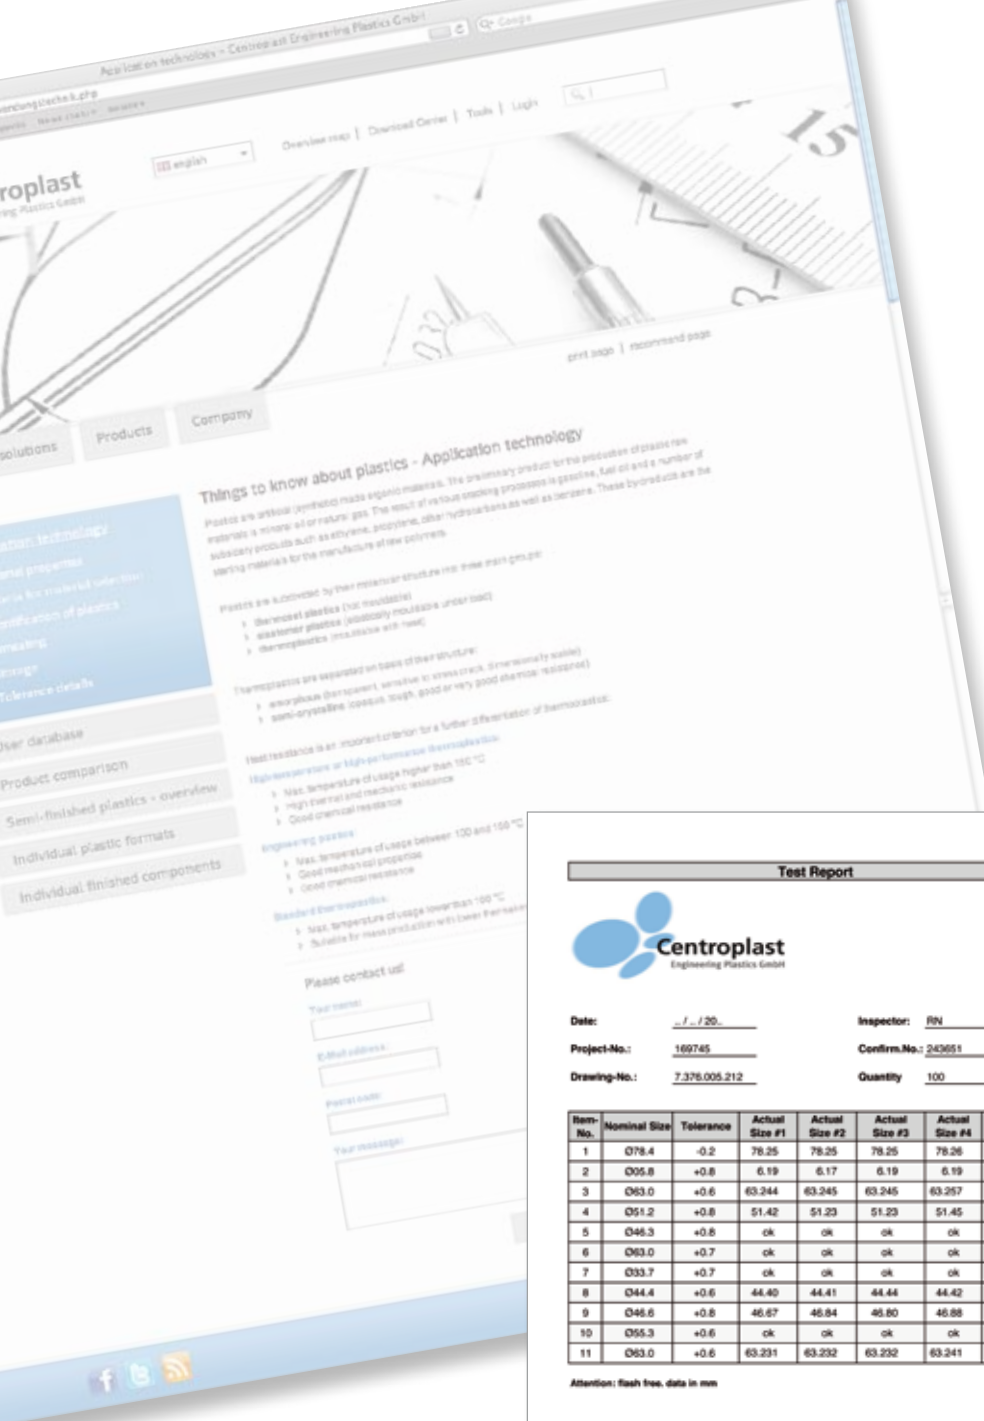

Short lead times make it possible to rapidly refine your product

A machined component is only as good as its individual parts - which is why we produce our semi-finished plastic products in our own factory. Countless dimensions in a variety of material types and colours are available, enabling rapid machining into your end product. We react quickly and flexibly to your specific requirements and are able to offer you professional and prompt delivery. Individuality is a top priority for us.

“Your satisfaction
is our priority!”

Our Competence is Yours!

You benefit from state-of-the-art production processes and a high level of automation

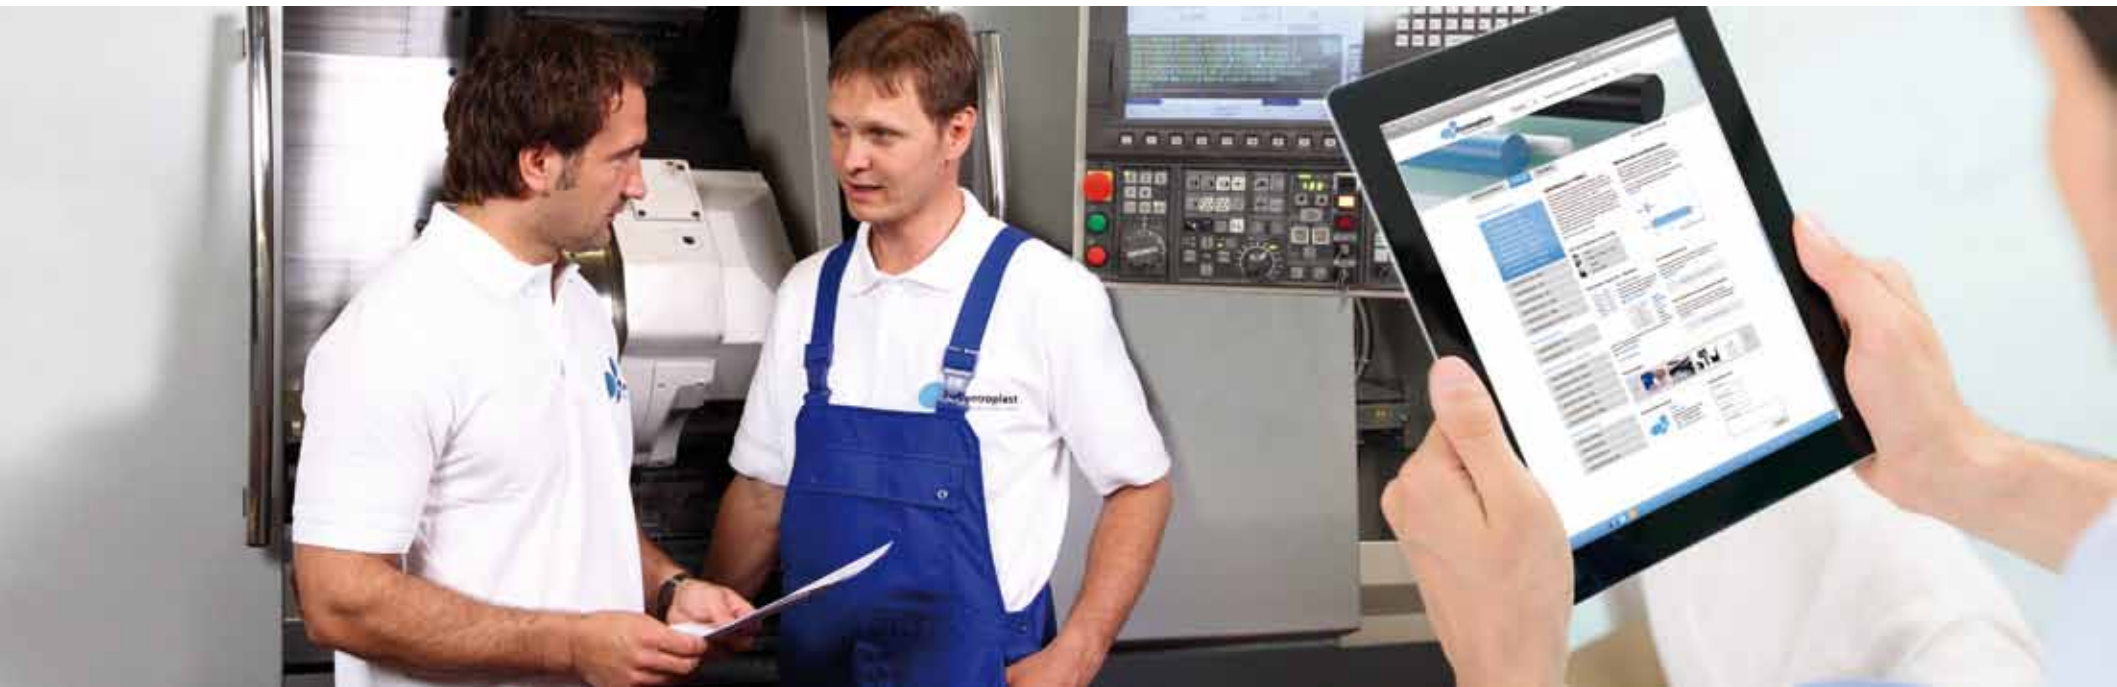

Latest machinery is a prerequisite for high-quality machine processing of technical plastics. Our machinery and the automation of our production are always state-of-the-art. Our 5-axis milling and machining centres produce geometries of all kinds and are the guarantee for the highest process stability and security. With state-of-the-art IT, our experienced specialists convert your ideas and dimensional drawings into perfect 3D geometries.

You'll be inspired by our absolute reliability, fast delivery time and material knowledge

As well as the use of state-of-the-art production technology, our service concept offers you the best support. Our competent employees will provide you with advice about the technical feasibility and cost-effectiveness of your inquiries. We guarantee you rapid and punctual delivery - even when the deadlines are short. You benefit from professional packaging systems, which guarantee safe and reliable supply of sensitive machined components. As well as personal consultation, extensive online information about our products and material choices will support you.

“Discover your options -
with a strong partner!”

We are committed to service and quality!

Our motivation is your success

For more than 50 years, we have been an established manufacturer of plastics and we haven't forgotten who we have to thank for our success. We have made it our duty to recognise, understand and satisfy your requirements and expectations. As your reliable partner, we work together with you based on friendliness, competence, flexibility and trust. These properties describe our corporate culture, which characterises us and is strived for each day by our employees. We adapt ourselves to your requirements and help you concentrate fully on your actual core business.

You depend on high quality - and we can guarantee you this

As an international complete service provider of thermoplastics, quality is our top priority. Our "Total Quality Management" is a supporting tool, which continually improves the day-to-day business of all processes. To guarantee that our products fulfil all quality requirements, we are certified in accordance with ISO 9001 and undergo regular independent audits. Automatic measuring machinery, calibrated test equipment, documentation, innovative IT and ultrasound inspections round off our quality service.
